**Custom Cutting Capabilities** - Our precision equipment will cut, score or score cut any roll of flexible strip material to the length that your application requires. Please consult your sales specialist for quotes and to have cut-piece yield estimates calculated.

**1. Full Roll** - Use full rolls of 50, 100 or 200 ft. for the versatility to cut your own pieces into a variety of lengths.

**2. Scored Rolls** - Specialized scoring machines make a precise cut through the adhesive liner and into the magnet at even intervals along the entire length

of a roll with a tolerance of +/- .060". Pieces can then be snapped off the roll at the desired length. Tighter tolerances are attainable on shorter cuts. Tolerances will vary depending on length of score.

**3. Score-cut Rolls** - Sophisticated score-cutting equipment makes a calculated cut through the magnet side, up to the paper liner at even intervals along the entire length of a roll with a tolerance of +/- .060". This makes it easy to peel the magnets off the liner for quick assembly line jobs. Tighter tolerances are attainable on shorter cuts. Tolerances will vary depending on length of score-cut.

**4. Cut Pieces** - High-speed, computer calibrated cutting equipment cuts full rolls to lengths as small as .1875" with a tolerance of +/- .060". Tolerances will vary depending on length of cut.

**Mega Saturated Magnetic Strip**  
**60% More Pull Strength from Same**  
**Size Magnet Strip!** - This special mag-

netic strip gives display and sign makers more versatility to use the same low-profile magnet with higher magnetic strength. Comes with acrylic adhesive on the non-magnetic side for steadfast attachment to plastics and non-porous surfaces. Perfect for those applications where regular magnetic strip is not quite strong enough.

Description	Pounds Pull Per Foot
.060" x .5" x 100 ft.	10
