Base of floating steel before insert

In our efforts to provide hospitals and business with top quality and economical printed dry erase boards, we are proud to announce our line of Frameless Floating Magnetic Changeable Chemical Resistant Boards.

Features:

1. Steel base gives it superior magnetic receptivity.
2. Offset floating frameless look mimics glass.
3. Price is higher than fixed boards but many times less than glass.
4. Daplus or DaPlus10 gives both extended life with freedom from ghosting and complete resistance to hospital disinfectants.
5. Changeability-can be accomplished in multiple ways with built in storage.
 - a. Multiple syntisol inserts can be placed under DaPlus10 lens cover.
 - b. Double sided insert can be coated on both sides with DaPlus
6. Inserts can be professionally laid out and made by us or you can use your own.
7. Boards are so magnetic receptive they work with our magnetic marker rings so you can keep markers on the board without a need for a tray.
8. Base steel has rounded corners for safety and are powder coated on back, front and sides.
9. Changing printed inserts only involves a minutes time and removal of 4 magnets. No tools needed.
10. Magnets to secure printed insert and lens cover are included in pricing.
11. See video, pricing and details at ahutton.com/index-frameless.htm
