

If you are buying a printed dry erase steel skin that you are framing yourself!!!  
We sell the steel skins in nominal sizes. We heavily stock 18x24, 24x36, 36x48, 48x72 and 48x96. All other sizes are cut from these. If you send us artwork the artboards should be the same size as the steel. Tell us how much your frame will cover on each side and we will draw it on your artwork so you can be sure no text is covered or art is not too close to the frame edge. All our skins are sold by size which represents the sheet of steel size, we do not sell it by visible size after framing. We will work with you and the artwork to make it fit properly. Just give us the steel size and the Frame overlap on each side.

1/2" frame on a top layer of art  
shows how framed board will look

Artboard should go to here =====>

Lines & colors should bleed  
under frame to end of artboard

To close to edge =====>

1/4" art to edge =====>
