

# NOW a hospital board frame design that allows you to change layouts

Our new Changeable Ohio Aluminum Frame (COAF) allows layouts to be changed in 30 seconds with our snap in frame design. Buy a economical pre-printed board and change it in the future at a minimal cost!

We have modified our Ohio aluminum frame so that our future standard production boards will be able to be instantly changeable. A new layout can be printed locally or by us and placed over your existing layout and covered by our DaPlus10 dry erase sheet. You now can buy a great priced board ready to go with your current layout and be comfortable that at any time it can be completely redone for a negligible amount. In fact getting our board versus buying an expensive changeable board from others (that you may never change) will now be a simple decision.

- \* Best graphics in industry at no charge
- \* 6-year proven warranty under hospital use with disinfectants
- \* Our boards were a great value board even when they weren't changeable. Now they are a fantastic future proof design.
