Indoff
www.ahutton.com

Our MarkaWall line with a 5 year limited warranty has the product to satisfy your dry-erase, magnetic and projection needs. Indoff—CT at ahutton.com has been a master distributor of dry erase product for over 10 years and we have assembled a product line from a range of factories to satisfy dry erase needs better than anyone. Our most popular MarkaWall group is our wallpaper like items that go over clean, smooth, and dry walls. Second in popularity is low-gloss so that you can write in and over your projections, such as for an interactive PowerPoint presentation. Our third most popular is for resurfacing chalkboards where a pressure sensitive adhesive backed product is used. We also have magnetic receptive boards that invite magnet use.

Product usually ships via UPS from our CT, MA or PA warehouse within 24 hours. Wallpaper paste is obtained locally.

All current pricing, product changes, stock status and info is on our Web site www.markawall.com. Uneven, pitted, textured paint and imperfect surfaces can not use wallpaper type products, call to discuss we do have other systems to handle these problems.

DRY-ERASE HIGH GLOSS, NOT MAGNETIC

Indoff
www.ahutton.com

VisualWall Designed to be the most economical dry erase marker surface anywhere, for creating high-impact communications. Its performance as a writing surface compares favorably with traditional porcelain marker boards. Surface is both very glossy, wear resistant, easy to clean and highly chemical resistant

EzWall The number one choice for resurfacing faded and outdated chalkboards, it provides a clean, bright, highly-readable surface that can actually enhance teaching and learning. Also eliminates chalk dust associated with asthma and allergy symptoms and computer problems. EzWall is applied right over existing chalkboards, so it's fast, easy, and costs considerably less than replacement of the chalkboard.

JustWall Designed as a high-quality, medium-gloss dry erase marker surface for creating high-impact communications anywhere. Its performance as a writing surface compares favorably with traditional porcelain marker boards, yet JustWall is much more affordably priced. High-performance Teflon* thermoplastic top film provides uniform coverage and makes dry erase writing easy to write, easy to erase Also available with GRID on 2" centers - very light - useable but not bothersome to viewers.

DecoWall If you must have colors this is the solution. These make up a small part of our sales because markers become very hard to see on non white backgrounds.

P/N	width	Rolls	Series	install	Backing	Description	List
VWP50	49"	50ft	VisualWall	Paste	Non-woven	a fantastic product at a fantastic price	\$13.48
VWP59	59"	50ft	VisualWall	Paste	Non-woven	a fantastic product at a fantastic price	\$16.23

MKR60	60"	100ft	DecoWall	Paste	Non-Woven	6 solid colors	\$29.54

MAGNETIC DRY-ERASE IS NOT PROJECTABLE

MAGWALL-LINED (WITH 2" FAINT LINES)AND MAGWALL GRID ON 2"
Dry erase marker surfaces that also are magnetic receptive so magnets stick to them . Great for use with magnetic labels, tape and graphics. Offers the user the opportunity to hang small and light papers and charts. Magnetic strength is limited—do not expect a big magnet to hold a big chart! Dry erase top film offers excellent readability and erasability. All surface are available in White only and are to glossy for projection. MagWall II will hold approximately the same as VisualWall-MP. The PSA backed VisualWall MR is thinner and has much less magnetic receptivity than the 5 other products in this group. Please get samples before ordering to see if material fits your needs.

P/N	width	Rolls are	Series	install	Backing	Fire Rating	Description	List
VWMR48	49"	50ft	VisualWall-MR	PSA	paper liner		Weaker receptivity	\$26.54
VWMP48	49"	50ft	VisualWall-MP	Paste	Non-Woven			\$26.54
VWMP59	59"	50ft	VisualWall-MP	Paste	Non-Woven			\$31.96
MM248-00	48"	75ft	MagWall-II	Paste	Woven	A		\$42.64
MMLA-48	48"	75ft	MagWall-Line	Paste	Woven	A	Light Lines at 2"	\$39.32
MM2GR	48"	75ft	MagWall-Grid	Paste	Woven	A	Light 2" x 2" grids	\$45.20

Both the Woven and Nonwoven are equal in receptivity but both are NOT for heavy objects and BIG magnets!

Please get samples to test for magnetic strength before you order. Know how much magnetism you need

EraseWall

Designed as a high-quality, medium-gloss dry erase marker surface for creating high-impact communications anywhere. Its performance as a writing surface compares favorably with traditional porcelain marker boards, yet EraseWall is much more affordably priced. High-performance Teflon* thermoplastic top film provides uniform coverage and makes dry erase writing easy to write, easy to erase.

Versatile, innovative wall covering turns any wall into a presentation surface. Primarily designed as an excellent low-gloss dry erase marker surface*, it also can serve as a projection screen for displaying images that don't require an embossed surface. Teflon * non-glare top film offers optimum readability and erases completely. ***EraseWall is 50% projection screen and 50% dry erase writing surface.**

NuVuWall Great for Projection and only very, very occasional writing since surface is very time consuming to clean. We have samples for you to test in your application. ***NuVuWall is 99% projection screen and only a 1% dry erase writing surface.**

—— very little sales—— most people use EraseWall

NEW learn more at ahutton.com or call Allen

DaPlus (a film like window tinting but with no tint that is highly chemical resistant, has a pressure sensitive back and is a superior performing and lasting dry-erase surface) rolls are 50" or 24.5" wide and the polyester film is .003" thick once the liner is removed. Plenty in stock in various length rolls from 10' to 750'. This is not for painted wall application for that use our Justwall or VisualWall. This is for surfaces like glass or laminate panels or OEM products that are very flat and require the BEST dry erase surface.

Installation

MarkaWall roll vinyl can be applied to any clean smooth sealed surface. Wallpaper backed MarkaWall can be applied using a heavy duty wallpaper adhesive. Pressure sensitive adhesive-backed material can be applied to non-porous surfaces (i.e. painted steel) by wetting the surface peeling the backing and sticking the surface directly to the area to be covered.

Horizontal seams are recommended when using the MarkaWall roll vinyl although vertical seams can be used For virtually invisible seams. All seams must be double cut and all vinyl should be railroaded (Reverse roll direction) to ensure color matching. All MarkaWall should be washed with an ammonia or alcohol based cleaner or mild soap and rinsed thoroughly with water prior to using. Watch video on web site for best installation advise.

Tac-A-Cork/Colored Cork

This tackable, durable, washable floor-to-ceiling and wall-to-wall communication surface is the perfect alternative to boring bulletin boards or dark cork wall tiles that crumble, deteriorate, and destroy wall surfaces. Tac-a-cork is a colorful linoleum/cork wallcovering that quickly, easily, and economically turns walls, doors, partitions, panels, and room dividers into decorative and functional spaces. It comes in 12 non-reflective decorator colors and it is as practical as it is beautiful. Self-healing its exceptionally resilient. It resists cracking, drying, or peeling, and the washable surface continues to look new even after years of use. Composed almost exclusively of natural, environmentally-sensitive raw materials, Tac-A-Cork is bio-degradable, hygienic, and inhibits the growth of bacteria. Comes in flexible rolls; calendared to a smooth-finish onto jute (burlap) backing for excellent adhesion and dimensional stability.
