HORIZONTAL SLIDING UNITS

Turn even a small conference room or classroom into a huge multimedia communication mecca.

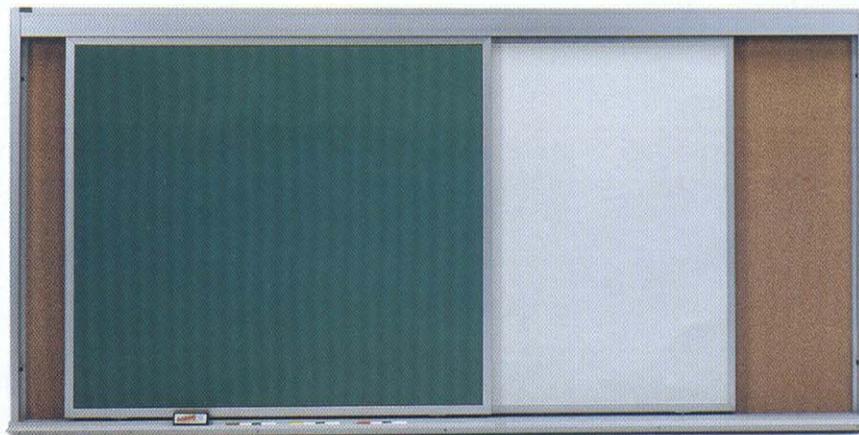

The Horizontal Sliding Unit can be used to combine writing boards, display boards, magnetic boards and even projection surfaces.

Sliding panels hang from nylon carrier rollers, top mounted to a monorail type track (See figure 1).

The bottom trim is equipped with a bearing type guide which rides securely in a full length track.

The result is smooth and easy movement of the panels from left to right. This permits different panels to be viewed at different times, thereby doubling, tripling or even quadrupling the working area. A fixed rear panel is secured by an aluminum channel.

Use your imagination and select any combination of writing boards and display boards shown on pages 2 and 3 for fixed and sliding panels.

Available Sizes

Series 10-170

Two track units 3" Deep 4 x 6 4 x 14

Series 10-171

Three track units 4" Deep 4 x 8 4 x 16B

Series 10-172
