- All standard Swingframes 3' x 5' Feet or larger are assembled with a clear acrylic break resistant window.
- Hardware hinges and latch closures are attached to the back part " Swing Shells" of the Swingframes. These "Swing Shells" are assembled in wood and painted black on the sides.
- White Duraplast sheet is assembled on to the wood shells providing the backing board for the graphic or poster.
- The front frame with the acrylic closes into the graphic, sandwiching the graphic between the backing board and window. Remo Repositionable tapes hold the un-mounted graphic in position.
- If your graphic is already mounted on 1/8" or 3/16" board, we can assemble the unit without a Duraplast backing board. You can place your mounted graphic on top of the wood shell.
- Other sizes can be custom built to your specs, including swing-open horizontal shapes.
- Substrates and other materials can be added such as; Cork Boards, Foamboards, Sintra PVC, Plastic, Wood and Fabrics. Please call for quote.
- Optional Side locks. New Hidden Gravity Locks.
- Swingframes above the size of 3'x3' is oversize for UPS and will be shipped common carrier.
- Custom Wood Profiles and New Magnet Latches are now available.
