EZ-Hang Hung to be Movable EZ-2-HANG BOARD

EZ-Hang Boards mount to wall very easily by two methods.

Most secure-Shown in left diagram where the EZ hang clips are at the top and bottom. To remove the board it has to be lifted slightly, then pull the top away from wall and slide down.

Less secure- Shown on the right. Just have EZ hang clip at the top so just lift up and remove. This can work if you need to have a portable board, but be aware it could be knocked off wall inadvertently. You could put a movable stop at the top so it could be locked in place.
