Specify number of sliding panels after model #: -1 for 1 sliding panel; -2 for 2 sliding panels or -3 for 3 sliding panels

FEATURES:

- Panels slide from the floor to the top of the unit. (With optional kick panel, sliding panels can be concealed when in down position, leaving the entire rear wall surface exposed.)
- Panels attach to counterweights to eliminate racking
- Counter-balanced panels operate over ball bearing neoprene rollers to eliminate all binding, side sway and noise.
- Housing and all trim are heavy-gauge extruded aluminum in satin anodize finish
- Ideal for heavy use areas, sliding panels are 7/8" thick; two panel housing is 6-1/2" deep; face is 4" wide.
- Balanced, lightweight panel construction safeguards against warpage. Provides needed rigidity and eliminates to and fro movement when panels are in use.
- Vertical sliding units are fitted, assembled and erected on a test panel at the factory before shipping. Components are clearly marked for easy reassembly on the job.

OPTIONS:

- Approved shop drawings required.
- Prices are based on porcelain enamel steel markerboard sliding panels and back panel; satin anodize finish aluminum frame and housing
