

Indoff Colored Forbo Cork

What is Forbo Cork

Forbo Cork is Environmentally Friendly and always looks like new. Forbo Bulletin Board Cork is made from pure natural ingredients that combine under heat and pressure to create a smooth, uniformly dense, suede like surface of unsurpassed beauty and durability. Expanded range of 15 contemporary colors that go all the way through to the burlap backing. For some great application pictures see on back of brochure.

Forbo Cork is a 1/4" thick uni-colored linoleum with a self-healing surface that accepts pins and tacks. It is twice the density of natural cork and is widely used in educational and commercial applications. Made from cork, linseed oil, wood flour, pine resin, jute and pigments. We sell the Forbo Cork under the Tac-A-Cork name but is exactly the same product distributed by Claridge as Claridge Cork, Walltalkers/RJF as Tac-Wall and Mark-a-Wall as Tac-a-Cork. If ordered from us you will get genuine Forbo Cork. We pull from multiple distribution points so we are able to get you the colors you want, in the quantity you want, in the time frame you need.

Product	thickness	width	Roll Length	Sq ft / Roll	\$SF/\$LF Less than Roll	\$SF/\$LF/Roll 1 full roll Price	Roll List
Colored	1/4"	4'	~94'	376	\$6.75/\$27	\$5.25/\$21	\$1,974
Colored	1/4"	6'	~94'	564	\$6.75/\$40.50	\$5.25/\$31.50	\$2,961

Generally rolls and cut lengths can shipped within 24-48 hours from OH
UPS can take up to 4' by 16' or 6' by 14'. Any more must go by truck!
Minimum truck rates apply and Fast truck deliveries are prohibitably expensive.

Recommended Adhesive for Colored Cork

Only L-910W is recommended by Forbo - anything else leaves you on your own.....

L910W is a solvent-free, SBR type linoleum adhesive.

Coverage is approx 35 sqft/quart at \$20, 150 sqft/gallon at \$65, 600 sqft/4 gallons bucket at \$182
Forbo Recommends L910W for direct to the Wall: Forbo adhesive is water based and works better with surfaces that breath, not recommended for Glass. Please note if this is for a direct to the wall installation, the installers should be familiar/trained in this type of installation. Some Installers think the Forbo adhesive is to quick to set. This adhesive can be used for flat panel assembly but care is needed. In general the L-910W is has higher initial grab than other adhesives but less of a final grab.

Forbo recommends applying to both wall and Cork at a specified thickness and then waiting (up to 20 minutes, depends on temp, humidity) for proper tackiness to develop. Material once put up needs to be rolled with a linoleum roller. Please watch video and read instructions at www.ahutton.com. Adhesive is applied with a notched trowel.

While use of factory recommended adhesive in itself does not guarantee a perfect installation, use of other adhesive w/ lack of experience with material, and L910W adhesive will probably lead to failure. Use of any other adhesive other then the L910W voids material warranty.

Installation and Tools

See notching and cutting tools at www.ahutton.com. Please get yourself set up correctly to install this high end product. Seams can be done by multiple methods and determining customers needs and your skills are critical for a top notch installation. Improper installation will be costly and material will not be replaced. Also damaged or defective material should not be installed. T103 trimmer is \$280 we also stock hook and straight blades. FAQ'S

Where to Get– Cork is not sold locally– order from Ahutton.com for UPS or truck shipment

Die Lots– Large orders for multiple rolls of one color– Make sure you specify same die lots

Roll Packaging –Material is shipped in a roll with brown craft paper around it on a skid

Fire Rating — is Class B, as is natural Cork. The only way to get Class A tack boards is to cover and A rated material such as fire retardant Homosote with a fire retardant fabric.

Installation: cuts etc

experienced installers do cuts by hand but there is are Forbo tools available, see our web site.

Free Samples of Forbo Colored Cork

The actual colored cork is on a sample board with all 15 colors. Each sample on the board is 1.25" by 2.125". If you require a 3"x5" piece we have limited pieces available.

Installation:

This can be difficult on walls but very easy on panels. We recommend you watch video, read full instructions, start with factory adhesive and get a sample piece to practice on if new to this material. Please watch video on our web site leave plenty of time for installation.

Ways to Purchase Colored Cork

- Can be bought as a part of a roll. For example you could order 8 linear ft from a 4 ft wide roll .
- Can be bought in full roll lengths at a better price. \$1.50 less per square foot.
- Can be bought glued onto hardboard in pieces up to 4' x 16' sheets.
- Can be bought glued onto stock pieces of Masonite as small tiles (see page 3 of brochure)

Cork Panels to 4' by 16' available pre-mounted
