

What is Forbo Cork ---

Forbo Cork is Environmentally Friendly and always looks like new. Forbo Bulletin Board Cork is made from pure natural ingredients that combine under heat and pressure to create a smooth, uniformly dense, suede-like surface of unsurpassed beauty and durability. Expanded range of 12 contemporary colors that go all the way through to the bur-lap backing. For some great application pictures see on back of brochure.

Forbo Cork is a 1/4" thick uni-colored linoleum with a self-healing surface that accepts pins and tacks. It is twice the density of natural cork and is widely used in educational and commercial applications. Made from cork, linseed oil, wood flour, pine resin, jute and pigments. We sell the Forbo Cork under the Tac-A-Cork name but it is exactly the same product distributed by Claridge as Claridge Cork, Walltalkers/RJF as Tac-Wall, Mark-a-Wall as [Tac-a-Cork](#) and [Polyvision](#) as Forbo Colored cork. If ordered from us you will get genuine Forbo Cork. We pull from multiple distribution points so we are able to get you the colors you want in the quantity you want in the time frame you need. 12/09

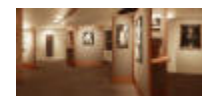

Product	thickness	width	Roll Length	Sq ft / Roll	\$SF/\$LF Less than Roll	\$SF/\$LF/Roll 1 full roll Price	Roll List
							Subject to change 1/1/2010
Colored	1/4"	4'	~94'	376	\$6.75/\$27	\$5.25/\$21	\$1,974
Colored	1/4"	6'	~94'	564	\$6.75/\$40.50	\$5.25/\$31.50	\$2961

All Full Rolls Are Based On 94' Rolls, But you can order partial rolls in full foot increments!

Shipping— Cork Weight 1.2 lb per square ft:

Generally rolls and cut lengths can shipped same day from PA
UPS can take up to 4' by 20' or 6' by 13'. Any more must go by truck!
Minimum truck rates apply and Fast truck deliveries are prohibitably expensive.

Recommended Adhesives for Colored Cork

Only L-910 is recommended by Forbo - anything else leaves you on your own.....
MarkaWall.....adhesive: Solvent-free, SBR type linoleum adhesive (L-910) or polyvinyl acetate dispersion type (contact adhesive) when used in press. L-910 sells for \$40.00 / Gallon 10 lbs
UPSable Coverage is approx 150 sq. ft. for walls or \$130 for a 4 gallon pail
Forbo Recommends for direct to the Wall: Forbo adhesive is water based and works better with surfaces that breath, not recommended for Glass. Forbo adhesive, for direct to the wall gluing is \$130 for a 4-gallon pail. Please note if this is for a direct to the wall installation, the installers should be familiar/trained in this type of installation. Some Installers think the Forbo adhesive is to quick to set. This adhesive can be used for flat panel assembly but care is needed. In general the L-910 is has higher initial grab than other adhesives but less of a final grab.
Forbo recommends applying to both wall and Cork at a specified thickness and then waiting (up to 20 minutes, depends on temp, humidity) for proper Tackiness to develop. Material once put up needs to be rolled with a linoleum roller.
An alternate is Henry #356, which you may purchase at any Home Depot or for \$33.00 per 4-gallon pail. The Henry's however is slower to set and while great for gluing to 1/8" hardboard (pre-fab Panels) Direct to the wall requires extra skill to get it adhere perfectly to wall. (lower initial tack must be factored in).
There have been uses of Cove Base adhesive by experienced installers with excellent results. (not recommended by factory).
While use of factory recommended adhesive in itself does not guarantee a perfect installation, use of other adhesive w/ lack of experience with material and of L910 adhesive will probably lead to adhesive and product failure. Use of any other adhesive other then the L910 voids material warranty.

FAQ'S

Where to Get— Cork is not sold locally— order from Ahutton.com for UPS or truck shipment
Die Lots— Large orders for multiple rolls of one color— Make sure you specify same die lots
Roll Packaging —Material is shipped in a roll with brown craft paper around it.
Fire Rating — is Class B, as is natural Cork. The only way to get Class A tack boards is to cover and A rated material such as fire retardant Homosote with a fire retardant fabric.

Installation: cuts etc
experienced installers do cuts by hand but there is are Forbo tools available, see our we site.

Free Samples of Forbo Colored Cork

The colored cork is on a sample board with all 12 colors. Each sample on the board is 1 1/2" x 1 1/2". If you required a 3"x5" piece we have limited pieces available. A bigger sample will usually require a purchase which will allow you to practice with mounting.

Installation:

This can be difficult on walls but very easy on panels. We recommend you watch video, read full instructions, start with factory adhesive and get a sample piece to practice on if new to this material. Please watch video on our web site leave plenty of time for installation.

Ways to Purchase Colored Cork —

- Can be bought as a part of a roll. For example you could order 8 linear ft from a 4 ft wide roll .
- Can be bought in full roll lengths at a better price. \$1.50 less per square foot.
- Can be bought glued onto hardboard in pieces up to 4' x 16' sheets.
- Can be bought glued onto stock pieces of Masonite as small tiles (see page 3 of brochure)

Cork Panels to 4' by 16' available pre-mounted
