We provide expert sales advice on the many options and brands we sell nationwide, so please contact us at (860)632-2026, visit us at [www.ahutton.com](http://www.ahutton.com) or e-mail us at [ahutton@ahutton.com](mailto:ahutton@ahutton.com)

### ***Surfaces we Offer at Manufacturer / Master Dealer Pricing—Full Details Inside*** →

- ⇒ MarkaWall—Flexible, light, dry-erase wallpaper. UPSable and a snap to put on
- ⇒ P3 Ceramic Steel— 50 years warrantee— timeless longevity
- ⇒ Claridge LCS and Vitracite — school grade name brand ceramic steel boards —
- ⇒ MarkaBoard — Exclusive to Indoff. Rigid High Performance Surface –very attractive features.
- ⇒ MarkaSteel-MG Unbeatable price in a magnetic steel dry erase surface —

### ***Why stay with chalk?***

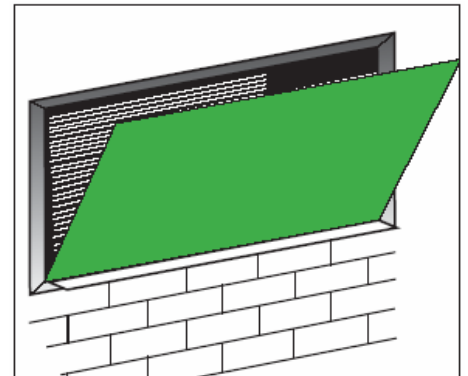

- ⇒ Chalk is less expensive than Markers
- ⇒ Some people are irritated by the chemical in dry-erase markers.
- ⇒ The surface does not clean well and a new surface will be easier to read and create much less chalk dust.
- ⇒ New surface will be magnetic

### ***Why resurface an existing dry-erase marker board?***

- ⇒ The surface does not erase cleanly anymore but the frames are in good shape
- ⇒ Certain of our dry-erase surface can also be used as a projection screen

### ***Why change from a chalk to a dry-erase marker surface?***

- ⇒ Chalk is messy and outright prohibited in computer rooms
- ⇒ Many are allergic to chalk
- ⇒ Dry-erase markers are much more visible in large rooms
- ⇒ More colors are useable then with chalk where you have contrast problems
- ⇒ Certain of our dry-erases surface can also be used as a projection screen.

### **Why trust Indoff at [ahutton.com](http://ahutton.com) to guide you?**

- ⇒ Indoff is a nationwide company with a great reputation and \$150,000,000 in sales yearly.
- ⇒ The sales partners at [www.ahutton.com](http://www.ahutton.com) are specialists in new dry erase and resurfacing.
- ⇒ We offer the widest range of choices anywhere and can provide a solution and system that is tailored to your specific application.
- ⇒ We have samples of our products for you to test before you buy.
- ⇒ We also have brand new framed boards if they fit your needs.

## MarkaWall — Quality Vinyl Dry Erase Wallpaper

Markawall can't be beat for smaller jobs since its at your door in a few days where you can cut it to size. The product comes in 6 versions to fit all your needs, from economy to superb Projectable dry-erase surface. Most styles are applied with wallpaper paste with the FilmWall, EraseWall, MagWall-Lite and EZWall offering self adhesive backs. See [markawall.com](http://markawall.com) for installation info.

### Surfaces from MarkaWall

MagWall "The Dry Erase Surface That Accepts Magnets" — Glossy

Good for writing plus it holds magnetic strips - not for Projection.

MagWall-Lite "High Gloss w/ less magnetic receptivity but a great price"

JustWall "Highest Quality Dry-Erase Presentation Wallcovering" - Glossy

Just for Writing - Best Vinyl surface for pure Dry-erase use

FilmWall "The most cost effective surface we offer with a great removable pressure sensitive back. It's a thin .008" so it needs a very smooth stable surface

EzWall "The Cost Effective Dry Erase Writing Solution" — Glossy

Just for Writing - Most economical - High Gloss— adhesive also

NuVuWall "The Projection Screen You Can Write On" -Lenticular Surface

Best for 90% projection use - A Projection surface that you can write on

EraseWall "The Projectable" Dry Erase Marker Surface— Flat

Good compromise between NuVuWall (best projection) and JustWall (best Dry-Erase)

- ◆ A solution that ships via UPS
- ◆ Shipment in 24 hours
- ◆ Projectable, magnetic and plain dry erase versions
- ◆ Single pieces up to 5' by 100'
- ◆ Very easy to field cut
- ◆ Some versions have adhesive back for ease if install.
- ◆ Must be installed on very smooth surfaces
- ◆ Surface is vinyl and can be ripped and cut
- ◆ No new chalkboard surface available in this line
- ◆ Magnets grab thru it if installed over top of steel

## P3 Alliance Ceramic Steel 28 Gauge from Polyvision

If you have lots of boards to do and you want the longest wearing magnetic surface there is, this is the product, with offerings in both chalk and dry-erase. Boards can be cut to size to fit over exposed boards so that you do not have to take frame apart. Shipping costs, crating, and cutting make this surface cost effective on 10 + boards at a time.

- ◆ Shipment in 2-6 weeks
- ◆ All P3 is steel so magnets adhere to it really well
- ◆ Low Gloss Projectable and High Gloss versions
- ◆ Single pieces up to 5' by 12' or 4' by 16'
- ◆ Steel skin can mask imperfections in surface being covered
- ◆ Surface is extremely hard and durable. 50 year warranty
- ◆ Must ship via truck— Expect a big skid the size of the sheets ordered
- ◆ Surface also available as quality green and black chalkboard

## Claridge 24 gauge Ceramic Steel —

The time tested leader in school dry erase surfaces. Uncut 4 x 8 sheets can ship from Texas but cut sheets and larger pieces are 3-10 weeks from factory in Arkansas. Both chalk available in 9 colors and dry erase in 5 colors (all high gloss) give you the biggest color choice. These skins are thicker than the Polyvision skins which can make them easier to handle without bending.

- ◆ Shipment in few days for 4x8 LCS all others sizes 3-8 weeks
- ◆ LCS is steel so magnets adhere to it really well
- ◆ Only available in one medium Gloss—not recommended to project on
- ◆ Single pieces up to 4' by 16' no 5 ft widths available
- ◆ Steel skin can mask imperfections in surface being covered its 24 Gauge
- ◆ Surface is extremely hard and durable. 50 year warranty
- ◆ Must ship via truck— Expect a big skid the size of the sheets ordered except is ordering a few 4x8 uncut sheets (come in a cardboard box)
- ◆ Surface also available as quality green and black chalkboard

## **MarkaBoard the new leader —**

MarkaBoard with the high performance plastic MarkaRace surface is only available as a high gloss dry erase surface in magnetic and non-magnetic versions. It is sold exclusively at [ahutton.com](http://ahutton.com). This surface has fantastic eraseability, the best of all our dry erase surfaces plus it is much harder than flexible surfaces, therefore it will last longer.

- ◆ Only available in 4 x 8 sheets or cut 4 x 8 sheets
- ◆ Shipment normally within a week
- ◆ MarkaRace surface is only available in high gloss which has the best eraseability of all our products but its not recommended to project on
- ◆ 4' by 8' is the largest size in this line
- ◆ All our substrates are rigid so they can mask imperfections in surface being covered
- ◆ Surface is an extremely hard plastic. 5 year warrantee
- ◆ Must ship via truck— Expect a 4' x 8' skid

Find us at [ahutton.com](http://ahutton.com) 860-632-2026

**See back cover  
for specs**

Substrates from MarkaBoard all with  
our great MarkaRace Surface on top

**MarkaRace Phenolic .050"** Best bet for nonmagnetic resurfacing jobs. Field cut with wood saws. Thin enough to look good over old surface without disturbing frame. Thick enough to cover most surface imperfections. Applied with contact adhesive or double sided PSA tape. Get in a batch and use and cut to size as needed

**MarkaRace 1/8" HB .125"** hardboard Most economical and easiest to cut but a little thick for resurfacing

**MarkaRace FRP .090"** Moisture resistant— best bet for outdoors and wet areas and rigid self supporting boards.

## **MarkaSteel-MG - fantastic value in a steel board**

In Stock and ready to ship this new thermal cured polyester coating allows us to produce a very erasable long wearing magnetic dry erase surface for penny more than steel. We stock standard 4x8 sheets and have 6 other cut sizes readily available. Custom pieces require large runs to get really low pricing. Call US.

**Priced right—** See price comparison on back or call for more info we know that you will be very impressed with the performance/value of MarkaSteel-MG.

And more— 2T bend radius, great erasability and consistent quality. This is a perfect product for large jobs where our volume pricing will make it less than 1/2 the price of Ceramic/porcelain Steel.

## **Melamine—**

Not recommended at all for resurfacing and only recommended for new boards when unit will have very limited use and true value is not a concern, just initial cost being the sole buying factor.

## **I want the best ERASEABILITY and I want the board magnetic**

Go for the MarkaSteel-MG or MagWall-Lite

## **I have 2 or 3 boards to resurface, what should I use —**

Markawall is the best for small jobs!

## **I need it fast**

MarkaWall is your choice. UPS shipment same or next day!

## **I have 100 chalkboards in a school and want magnetic whiteboards to last forever**

Go with the P3 cut to size to glue over the chalkboards

## **I have boards where frames are cracked and surface is very uneven.**

Call us for new unit pricing complete with frames and marker trays or visit [ahutton.com](http://ahutton.com)

## **I have old slate boards and want a new high contrast chalkboard**

Either Claridge Vitracite or Polyvision P3 will work here

## **I need a non-magnetic surface that I can field cut that's has great erase ability**

MarkaRace Phenolic is the product that is perfect for cut and place applications

**No one Knows Dry erase Better— Call US**
