Egan Etex Cabinets

The Egan tradition of leadership continues with the creation of Egan Etex Cabinets. Now you can enjoy a soft-line design in a wide-range of colors normally only available in high pressure laminates. With our standard colors and 105 optional

colors to choose from, discriminating buyers will find Etex Cabinets blend or match easily with room trim, drapery, carpet, and color laminate furniture. The textured catalized coating is a seamless, durable, attractive finish that's easy

to maintain. Available in a variety of sizes and with pencil-edge or bullnose detail. Either way, with Egan Etex Cabinets you can take advantage of contemporary style that can create a lasting impression.

Egan Etex Cabinets feature an Egan Flipchart, magnetic porcelain Eganboard, Egan Projection Screen, Egan Tackboard and ample storage space for your EganMarkers and Brush.

The Egan Etex Cabinet features a textured catalized coating that's attractive, has a forgiving finish and unlike plastic laminate, is repairable.

Bullnose Etex. Combined with the textured Etex finish, the bullnose detail creates a strong, contemporary feeling.

Pencil-Edge Etex. With a textured finish and the pencil-edge detail, the Etex cabinet is capable of complimenting its surroundings while being the focal point.
