The Simple Standalone Copyboards do the following.....

Think Snap Shot, since they capture what is on board like a camera- they do not see every letter you write as you write it. You click to take the Snapshot to capture what's on the board at a moment in time.

These Simple Standalone Units are great for no fuss copies for all office personnel with no training or PC connectivity involved.

- › They do NOT control the PC when connected to one.
- › They do not need a PC or a printer connected to the PC to get a hard copy
- › They do print out copies on plain or thermal paper from a built in printer
- › Most units also allow you to output to a PC via USB port or memory stick.
- › Once PC has been sent image you can email it or print it out.
- › Some units scan in color others are strictly B&W.

Panasonic
ideas for life

The **simple standalones** use either scanners or cameras to read the board in one shot.....

[Plus M](#) prints in color - No PC required use HP color printer (not included \$60 item),

has Compact Flash Cards to transfer images to remote PC's. - The Best of the Best

[UB Panaboard](#) 2-panel units with thermal and plain paper

[Plain Paper KX-B735 Panaboard](#) 4 panel plain paper

[CopyCam](#) Unique fixed unit copies up to 4' x 8' print in color. Has built in web server.

[KX-BP800 Panaboard](#) Its Interactive but has basic Copyboard functions also built in printer

[IdeaShare](#) These units with addition of printer are Standalones but have Interactive built-in.

TEAM BOARD

PRESENTATION BOARDS

◆ The Interactive Boards do the following Think Real Time.

- › They need a PC to store images
- › They need a Printer hooked up to the PC hooked to board to get a hard copy
- › They can work with Net-meeting to share work in real time.
- › Control the PC when in interactive mode via image from LCD projector .
- › ...Most units interface well with Microsoft NetMeeting
- › The Interactive units are great as PC training tools when used with a LCD projector and PC, you can project onto board and run the PC from the board.
- › Interactive PC's use various technologies or combinations of touch sensitive surfaces, infra-red, ultra-sound and laser light.
- › Require operator training and work best when used in a fixed location.

Interactive Boards are the...Egan TeamBoards, Webster TS, Quartet Ideashare, Plus PoinTech and Panasonic KX-BP800

If 90% of your use is just getting copies and you do not have a dedicated PC that's there and ready you probably want a Simple Standalone Copyboard.....

See back Page for some Comparisons

PLUS M series (Simple Standalone Copyboard)

****Our Most Popular & Best Value****

Softcopy or Hardcopy its your choice

M-11 series Quick Facts Writing Panels: 2

Writing Area: M-11S 36" x 51" M-11W 36" x 70".

Paper Type: Plain Paper Inkjet from printer you supply.

This unit scans, stores and prints in **color**. The world's only Copyboard with a built-in USB Memory stick slot is here! An overall improvement and upgrade to the world of electronic whiteboards, the M-Series from PLUS gives you the choice of printing out your notes, or saving a digital copy to a USB memory

card or directly into PC via a USB cable. The USB memory stick function allows you to scan and save your written notes in PNG image format. Cards are so inexpensive every user can have their own. The M-11W allows for color or black and white printing with any PCL compatible HP DeskJet printer (not included). The popular Deskjet series of USB printers from HP print onto standard 8.5 x 11" copy paper, cheaper and longer-lasting than thermal printer. You can utilize the printer in either the copyboard's wall-mounted or floor-standing configuration.

CR-5 the new color replacement for the M5 is now available for when you need a great copyboard in a office size unit.

PLUS

MSeries

NEW PLUS M-11 S/W

Color Printing and USB Memory Stick digital storage, with a direct PC connection via a USB cord.

Push a button to output your ideas digitally or to paper!

Save Digitally

- Easily distribute exact copies of your work via e-mail to your audience and to people at distant locations who were not present.
- Include your work in applications such as office programs.
- Further edit and enhance your work with image editing programs.

Print To Paper

- Quickly and efficiently present your audience with an exact copy of the material on the board.
- Listeners can commit their attention to the presentation, not to taking notes.
- Maintain consistency by preventing errors or omissions in drawings, charts and diagrams.

Better than a whiteboard while just as easy to use!

- Available in Standard & Wide Sizes
- Wall Mount Kit provided
- M-11S pictured with optional Floor Stand and optional Printer

USB Memory Stick

With a USB Memory Stick inserted into the M-11, you simply press the Save button on the control panel to save the information and ideas written on the board.

Direct PC Connection

Download the contents of the board directly to your computer via a USB cable. Also, conveniently control the operation of the M-11 using the bundled software.

On-Board Printer*

Print in four-color or black and white. Present your audience with an exact copy of what has been written. Inkjet and laser printer compatible.

*Printer sold separately.

Quartet® IdeaShare™ Board (Interactive and Simple)

- Premium porcelain whiteboard (very long wearing) with fully integrated eBeam™ electronic imaging technology. Ultrasonic!
- Notes and images from the board can be saved to a PC or Mac, beamed to any PDA handheld with Palm™ OS, directly printed with the touch of a button (printer not included) or shared live over the Internet or intranet.
- Features a graphite frame with storage compartment, accessory tray, four electronic pens, dry-erase markers, electronic and standard erasers, stylus (for wireless mouse use), software, power supply. Old models Q8460 & Q8430 had serial ports - the new upgraded PN's are exactly the same except they come with a USB port Models Q8600 and Q8500.
- Mobile graphite stand (sold separately) is designed to hold either the 4' x 3' or 6' x 4' Boards.
- Unit is very nice looking—will fit in conference rooms.

TeamBoard the best Interactive Touch Sensitive Board

One Whiteboard – Three Presentation Solutions.

TeamBoard Suite: Electronic Whiteboard Mode Electronic Whiteboard Mode. Designed for true ease of use, TeamBoard begins to capture what you draw the instant your pen touches the drawing surface. In 'Whiteboard Mode', TeamBoard Suite provides easy-to-use tools that assist in content preparation and lesson development

Egan PowerX: Interactive Touchscreen for Microsoft PowerPoint® Sensible, easy-to-use software: PowerX is designed exclusively for PowerPoint presenters. Nothing To learn!!

TeamBoard Suite: Interactive Touchscreen Mode for any application. TeamBoard Suite handles virtually any application – you decide what's best

The TeamBoard Promise:

PanaBoards UB Series by Panasonic (Simple Standalone Copyboards)

Let the Panaboard take notes NOT you! The Panaboards UB Series are just the ticket for functional simple time tested black and white only Copyboards. They come complete with wall brackets, built in printers, USB jacks for output to a PC. These are 2 panel units that have an endless dry erase surface that moves under the scanner head. Two sizes available (see back panel).

=> Panaboard also has a KX-BP735 plain paper built in printer model which has 4 panels, with a optional output to PC module. Its available in one size 33.5" by 52".

CopyCam (simple Standalone) transforms existing whiteboards or chalkboards into Copyboards, instantly capturing notes and projections by simply pressing one of three buttons: print, save to disk, or save to the Web. There is no equipment setup prior to meetings, and CopyCam is so intuitive, no computer or training is necessary. Advanced lens optics embedded in a wall-mounted camera arm capture every image with superior clarity – even notes in the far corners. On boards sized up to 4' x 8', every mark is captured with precision. technology, enabling wireless printing.

- ◆ Mounting: Most units can be either wall mounted or optional mobile stands are available. Simple Copyboards are most often used on mobile stands while interactive units tend to be wall mounted since they need PC's, LCD's, setup time etc.
- ◆ Ordering: Indoff takes purchase orders or credit cards.
- ◆ Most units ship via motor freight (they are to large for UPS) with charges of \$100 to \$200 Ideashare, Webster, some Plus Boards are freight free. TeamBoard at 4 boards!
- ◆ Quantity discounts do apply and we also have resale pricing for dealers. Please call or fax us a request for a written quote with shipping included based on you quantity.
- ◆ FOB point: none of the products ship from our CT sales office. All product ships directly from manufacturing facilities or from regional warehouses.

Once you've saved a copy of your notes, you can e-mail them to the entire office, add to a digital archive, or integrate into training materials such as PowerPoint. Perfect for the corporate boardroom, education, training, or your committee brainstorming sessions, PLUS' electronic whiteboards enhance meeting productivity by allowing participants to focus on the meeting rather than taking notes.
