

CARE AND MAINTENANCE INSTRUCTIONS FOR CHALKBOARDS AND MARKERBOARDS

Daily Care and Maintenance

The same procedure is used to clean both chalkboard and markerboards

- For the initial cleaning, wipe your board with a clean cloth moistened by a liquid cleanser.
- Rinse with clear water. This is simple but very important.
- Wipe dry with a clean cloth.
- If your board is used daily, the cleaning should be performed at least 2 to 3 times a week. More thorough cleaning may be required if writing is left on the board for more than 2 days.

Removing Crayon and Tape

The same procedure is used to remove both crayon and tape.

- Dampen a clean, dry cloth with water.
- Sprinkle a small amount of powdered cleanser onto the cloth; we recommend using Bar Keeper's Friend. If you are unable to locate this product please call our Dealer Direct Center at 918-759-2301
- Begin cleaning a small, manageable area using a back and forth horizontal motion. Use normal pressure as if you were cleaning a window.
- Wipe off all residue with a dry cloth.
- Rinse well with clear water. Please note that the rinsing and drying steps are very important.
- Wipe dry with a clean cloth
- Follow the same procedure for the remainder of the board.

Removing Permanent Marker

- Moisten a clean, dry cloth with isopropyl alcohol. Use less alcohol for chalkboards
- Wipe the board in a circular motion to loosen marker residue.
- Rinse with clear water/Dry the board with a clean cloth

Surface Scratch Test

You may perform this simple scratch test to see if your board is made of Alliance Ceramicsteel:

- Using a sharp object such as a key, scratch a small, hidden area of your board.
- If your board did not scratch, congratulations, you have an Alliance Ceramicsteel product. A painted surface board is easily damaged, but an Alliance Ceramicsteel board resists scratching. If a scratch does appear you may want to contact your local ceramicsteel board dealer.

ALLIANCE CERAMICSTEEL BOARDS ARE WARRANTED TO LAST A LIFETIME...
