

200 SERIES

DRY MARKERBOARD
CHALKBOARD OR TACKBOARD

SUGGESTED INSTALLATION INSTRUCTIONS FOR 200 SERIES MARKER, CHALK & TACK BOARDS

Note: Complete installation hardware is included with each unit. If wall construction prevents the use of hardware as furnished, it is the responsibility of the customer to furnish the required fasteners.

1. Verify sizes, color & quantity of units delivered with units ordered. Contact the dealer or sales office where purchased to report any discrepancies.
2. Determine locations and mounting height above finish floor (AFF). Level and strike a chalkline at this point.
3. Drill $\frac{1}{4}$ " holes 1" above this line @ 16" or 24" centers. On sheetrock walls, put fasteners at locations of studs and insert plastic plugs. Position holes so they are 6" from each end & all others 24" on center.
4. Anchor AH-1 mounting clips to wall with suitable anchors. Hold clips at center of slot and secure firmly so bottom edge of clip lines up with chalkline.
5. From bottom of chalkline, measure a line equal to the height of the unit and level and strike a chalkline at this point.
6. Position HR-16 hanger bar so top of bar is along that line. Drill $\frac{1}{4}$ " holes through HR-16 and through wall along this point 16" or 24" on center. On sheetrock walls, put fasteners at locations of studs and insert plastic plugs.
7. Fasten HR-16 hanger bar to wall with suitable anchors. Be certain hanger is leveled to align properly with unit. Shim where necessary.
8. Apply egg-sized gobs of manufacturers recommended Henry's #237 adhesive at 16" centers in field area of panel.
9. Lift unit so top trim member engages with HR-16 hanger bar.
10. Tap bottom AH-1 clips upward until they touch trim or chalktray.
11. Screw $\frac{1}{2}$ " long #8 tek screws up through holes in bottom clips and through trim members.
12. Inspect writing surface for polyfilm. Remove if present. Wash all dry markerboards and chalkboards prior to use.
