

WEBSTER™ TOUCH SENSITIVE (TS) ELECTRONIC WHITEBOARD

PolyVision's **WEBSTER TS SERIES** is designed to instantly capture everything written, drawn, or projected on its surface. With training and tech support, the Webster TS electronic whiteboard becomes easy to use and allows teachers and students increased functionality as a static dry erase or interactive whiteboard and projection surface. Using the surface with projection enables users to control a linked Macintosh or PC from the whiteboard, further enhancing the teaching and learning environment. For more details and product demonstrations visit our Web site at www.polyvision.com.

WEBSTER LASER TRACKING (LT) ELECTRONIC WHITEBOARD

PolyVision's **WEBSTER LT SERIES** uses a patented laser interface and P³ ceramic steel surface to provide the precision of laser tracking on a surface that is so durable it's guaranteed forever. As with the Webster TS Series, the Webster LT instantly captures everything you write, draw, or project by simply connecting the board to a PC or Macintosh laptop. The whiteboard literally becomes an extension of your computer and the stylus your mouse.
