

COPYBOARD SYSTEMS

Convert your existing markerboard or chalkboard into a color copyboard in minutes. PolyVision's **CopyCam® Image Capturing System** instantly captures notes and images up to a 4' x 8' space* with the touch of a button. It's that easy! Just work on the board as usual and then press one of three buttons to print, save to disk (standard floppy), or save to the Web. Students no longer need to spend time copying notes, which allows for a more effective teaching and learning environment. CopyCam is so intuitive that you don't need a computer and no training is required.

COPYCAM PRO
