VERTICAL SLIDER FEATURES & DETAILS

- Lead weight counterbalances
- Eight heavy-duty ball-bearing rollers per panel
- Honeycomb core with internal aluminum subframe, on all panel units sized over 32 sq. ft.
- Reinforced corners and cross cabling
- Two nylon/polypropylene guides on each side of panel
- Stainless steel plastic-coated aircraft cables
- Clear anodized or color powder coated aluminum extrusions designed for each product (not pieced together)
- Motorized unit available over 12'
- P³ ceramicsteel writing surface
- Vertical slider cover panels can be located in front of either fixed rear-view projection screens or fixed marker, chalk, or tack boards. Panels can be positioned into concealed storage pockets above or below fixed back panel area.
- OPTIONAL KICK PANEL: The floor-mounted applications are provided with a kick panel to conceal vertical sliding panels while in the down position. The kick panel is typically made up of 1/2" particleboard which can be primed on both sides for field painting to match any existing décor. Plastic laminate face also available.

For best results, PolyVision recommends the use of qualified installers for all sliders.

POLYVISION P³ ceramicsteel FOREVER WARRANTY

POLYVISION FOREVER WARRANTY
PolyVision is the only company that warrants specific visual communication products and surfaces for as long as they are installed and in use, or forever, whichever occurs first. This warranty is unconditional under normal usage. If the surface fails, PolyVision agrees to repair or replace the ceramicsteel writing surface, no questions asked.
