

ALWAYS EARTH FRIENDLY

THE AEF QUICKCONNECTED 3 MINUTES INSTALLATION

- 1) Turn off power
 - 2) Disconnect the line power connected to the existing ballast
 - 3) Connect 3' power whip, **hot (writing on wire) & neutral (dashed or no lines)** to the line power
 - 4) **Magnetize** the LED units to the fixture – no need to change out **lamp holders they are not used**
 - 5) Plug opposite end of the 3' power whip into the side of the 1st LED unit, plug jumper whips to connect other units as needed
 - 6) To make an 8' unit – connect two 4' units using the 2" connector whip
 - 7) Turn power back on
- (There is no need to remove ballast if it is not leaking or required for rebates. Simply leave in the fixture)
