EXTRUSION IDENTIFICATION CHART

Please Note:

When estimating shipping costs, be aware that anything

OVER 8 feet in length must ship by Common Carrier.

Orders UNDER 8 feet may ship by UPS.

8 ft via UPS incurs oversize charges

Anything over 15 feet in length will incur an additional charge of \$57.00

Over 16 ft usually bumps frt class to 150 and gets very expensive.

Standard Lengths per item are Listed!

Add .20 per linear foot for cut pieces. No discounts for partial pieces. Customer can choose to ship or have us discard remainders. For example, if a part comes in 24' standard, and a customer cuts a piece to 8', he / she is still responsible for the cost of the full 24' piece and must decide what to do with the 16' remainder.

Packaging charges will vary.

As a general rule, the more you order of standard sizes, the more you can save on crating, shipping and cutting charges!

Custom lengths, finishes available if you can wait for next mill run! Call us.

Actual Framing: Most boards are made by notching the extrusions and bending to 90 degrees. You can do plain 45 degree cuts but please know how to use these materials.

All aluminum extrusions below are satin anodized unless noted otherwise.

Please request a quote before ordering, please contact Jen
