

Specification for ⇒

MarkaSteel-MG Aluminum
Framed Dry Erase Marker-
boards. Large CBA style

CBA, style Markerboards

CBA style markerboards shall be constructed of 24 gauge coated steel media surface laminated to 1/4" or 1/2" particleboard. Unless requested they will not be backed with a .005" aluminum moisture barrier. CBA markerboards shall be framed with aluminum extrusions. All corners shall be mitered and closed to a hairline joint. Standard chalk tray with slightly rounded corners shall be provided.

There will be no Display rail 1" with cork insert end stops and map hooks mounted at the top of the board unless specified.

Media Surface to be MarkaSteel-MG

- Marker Characteristics: excellent for Dry erase, Wet Erase and a high Permanent Marker resistance
- Water, alcohol and Expo cleaner are recommended
- Technical: Roll coated on Coil Thermal Cured Polyester Based .0005" clear coat with marker characteristics all the way thru. (there is no thin surface enhancer (such as wax or temporary surface coating to quickly wear away). Clear coat is appliance grade for both hardness, scratch resistance and durability. Clear coat is over a white base coat.
- Gloss is 85-92 at 60 degrees by instruments but is subjectively less due to 55 gloss
