## EDUSCREEN B

The EDUSCREEN B comes with an easy pull-down system that can lock at specific intervals to fit a number of projection formats. Nylon bearings create a smooth, quiet operation with no distraction. Case design allows for flush mounting to the wall or ceiling. The Eduscreen B is available with a Controlled Screen Return (CSR), an exclusive feature furnished only by DA-LITE. CSR assists in the quiet return of the screen into the case.

## SCREEN SURFACE OPTIONS

*Not available for QuartzVue projection surfaces.*

### MATTE WHITE

The most versatile screen surface and the premier choice when ambient light is controllable. It evenly distributes light over a wide viewing area while colors remain bright and lifelike with no shifts in hue.

### GLASS BEADED

This surface has the ability to achieve a higher gain by reflecting more of the projected image back along the projection axis. Glass beads impregnated into the screen's surface provide additional reflectance. This creates an unparalleled screen surface that reproduces vibrant lifelike color at moderate viewing angles.

### HIGH POWER FABRIC

A technological breakthrough, combines the reflectivity of a glass beaded finish with the ability to clean the surface when required. Its smooth surface offers the highest gain of all types of screen surfaces with moderate viewing angle.

**ALL SCREENS ARE SQUARE FORMAT (applicable to all screens).**
